DSTU2 Ballot to Final breaking changes

A list of all the changes made to DSTU 2 after DSTU 2 ballot that were labelled 'non-compatible':

- 2865 Clarify the functionality of GET [base][compartment][id]?
- 3011 CarePlan.activity.note needs further explanation
- 3249 Profile.date should have a more meaningful name
- 3361 Message endpoints should be associated with the event protocol
- 3627 Value set - define/concept[0..*] needs additional wording
- 3633 Change .expansion.timestamp datatype to dateTime
- 3855 search param naming is inconsistent
- 4003 Resource Encounter Content
- 5165 Jan 2015 Ballot Comment #32
- 5444 Jan 2015 Ballot Comment #337
- 5457 Jan 2015 Ballot Comment #396
- 5561 Composition.type and Composition.class definitions should be improved according to the improvements made to DocumentReference.
- 5678 List.flag vocabulary
- 5680 order of common resource elements not consistent
- 5695 Medication should be required in MedicationStatement
- 5698 Appointment.order can't work at present
- 5701 MedicationStatement.wasNotGiven should notTaken
- 5760 translate does not suport dependsOn
- 5895 is Order.authority part of 80%?
- 5940 allow MedicationStatement.quantity to be either a quantity or range
- 5947 Relationship between child concepts and supression needs clarification
- 5951 Timing doesn't allow an overall duration
- 5961 Change DiagnosticReport.name to .code
- 5997 Rename Provenance.agent.reference
- 5998 ImagingStudy should use CodeableConcept, not Coding
- 6029 More precise definitions of some concept map equivalence codes
- 6040 StructureDefinition/ElementDefinition overlaps
- 6067 Split Supply into SupplyRequest and SupplyDispense
- 6079 StructureDefinition needs a target type property
- 6089 Telecom doesn't allow for alternate systems
- 6094 change 'subject' search parameter
- 6104 Tooling should enforce coding capitalization consistency
- 6118 409 status code
- 6122 Support non-atomic transactions/batches in RESTful API
- 6129 Change the Procedure attribute type to code
- 6130 Change attribute name for Quantity.code, Quantity.units, Quantity.system
- 6171 Flag.patient should be [0..1]
- 6215 roll up CarePlan.activity.detail.note into CarePlan.activity.notes
- 6216 Goal.concern reference list
- 6242 ImagingStudy.clipInInformation should choose of string or Condition resource and possible code?
- 6253 body site should be a datatype - but used consistently throughout the standard.
- 6269 AuditEvent needs a Participant userid type code to explain how to understand the value in userid (e.g. Patient ID in CX form)
- 6304 Abstract for Action Who/What/Where/Why across Resources
- 6309 Allow reference to medication to be either a code or a Medication Resource Reference
- 6310 Add MedicationStatementStatus for planned future medications
- 6311 Need better explanation of DataElement Slicing
- 6331 Clarify whether conditional operations in a transaction include [base]
- 6336 "Executing an Operation Asynchronously" should be removed
- 6343 The /Mailbox endpoint is no longer needed, given FHIR's "operations" framework
- 6637 Add modifier to string parameters to indicate what kind of partial match is required
- 6793 2015May sdc #10 - Use stringency, not specificity
- 6868 2015May sdc #85 - Why unassessable?
- 6913 2015May sdc #136 - How are "append" relationships handled?
- 6922 2015May sdc #145 - Request that max count be unbounded
- 6944 2015May core #9 - Make reason 0..*.
- 7018 2015May core #63 - Response: Specifying paging support would be a welcome addition and would further increase interoperability.
- 7123 2015May core #182 - What's difference between Procedure.category and type?
- 7127 2015May core #186 - Procedure.relatedItem is too complicated - make it extension
- 7154 2015May core #213 - Explain reliability
- 7347 2015May core #537 - Schedule.actor has resource type of "Any"
- 7366 2015May core #556 - Why not avoid this problem by requiring contained resources to explicitly state their subject? Why allow this degree of optionality?
- 7404 2015May core #594 - Is narrative the same for documents vs. other mechanisms?
- 7428 2015May core #716 - Using of Snomed CT
- 7431 2015May core #719 - AuditEvent source identifier
- 7454 2015May core #742 - Can only one be declared as primary? Can none?
- 7457 2015May core #745 - should allow for multiple Coding returned - should at most one marked as primary
- 7460 2015May core #748 - Allow non-resources to be focus of Provenance
- 7483 2015May core #778 - consistency of FamilyMemberHistory's condition with the Condition resource
- 7511 2015May core #602 - Make names consistent between Procedure and Encounter
- 7515 2015May core #806 - rename MedicationStatement.dosage.schedule to MedicationStatement.dosage.timing
- 7517 2015May core #808 - Bring back Observation.component
- 7518 2015May core #609 - Immunization.protocol cardinality
- 7521 2015May core #812 - ICD-9 system URLs
• 7525 2015May core #816 - MedicationStatement.status definitions
• 7530 2015May core #821 - remove ElementDefinition.binding.name
• 7541 2015May core #832 - Simply conditional create header
• 7543 2015May core #834 - include transitiveness
• 7545 2015May core #836 - transaction and base interaction
• 7550 2015May core #841 - AllergyIntolerance negation
• 7581 2015May core #872 - How do we specify an "active" or "resolved" problem?
• 7583 2015May core #874 - We need a status to specify whether the med is "active" vs. "discontinued" meds?
• 7587 2015May core #878 - body site is overly complicated (Observation)
• 7613 2015May core #904 - How is encounter diagnosis handled?
• 7617 2015May core #908 - Is Working vs. Confirmed in the 80%?
• 7621 2015May core #912 - Aren't these all similar items? Shouldn't they all be called target or detail?
• 7622 2015May core #913 - Allow structures in notes, make 0..*
• 7629 2015May core #920 - Suggest renaming to 'bodySite' or 'affectedSite'
• 7631 2015May core #922 - Procedure.device -> targetDevice
• 7633 2015May core #924 - Procedure has evolved since ProcedureRequest was drafted. Suggest re-aligning the two resources to account for changes in one, relevant to the other.
• 7636 2015May core #927 - Should 'applies' be renamed to 'physiologicallyRelevant[x]'. While short names are good, they must also be more descriptive.
• 7639 2015May core #930 - What's difference between has component and has member?
• 7651 2015May core #942 - Need to categorize re-admissions
• 7655 2015May core #946 - Recommend renaming this to referralRequestFulfilled
• 7693 2015May core #984 - Who or what should sign a bundle and how is this used? RBAC? What happens if a transaction is not signed?
• 7702 2015May core #993 - Can signature be captured by blob?
• 7711 2015May core #1072 - Replace Provenance extension
• 7733 2015May core #1074 - The use of the DocumentReference.confidentiality element is not conformant with the HCS requirements on Security Labels. This needs to be fixed.
• 7760 2015May core #1081 - Add dependsOn element as an input Parameter with parts, and product as an output Parameter with parts.
• 7761 2015May core #1082 - Allow ConceptMap/Translate to have multiple outcomes
• 7859 2015May core #1179 - Condition.dateAsserted definition clarification
• 7864 2015May core #1184 - Condition.clinicalStatus should not convey both record status (in error) and confirmation Status (working, confirmed, refuted)
• 7867 2015May core #1187 - Add a record status to communicate active, in error, cancelled
• 7894 2015May core #1214 - Rename AllergyIntolerance.event
• 7897 2015May core #1217 - Should immunization be searchable by subject since there is no subject parameter (if yes, should AllergyIntolerance be searchable by subject[)?
• 7906 2015May core #1226 - Encounter condition relationship
• 7913 2015May core #1233 - MedicationStatement.statu clarification
• 7924 2015May core #1244 - Clarify content-location for Reads without Versioning support
• 7954 2015May core #1274 - Remove _language query parameter support
• 7957 2015May core #1277 - Alternative suggestion for Date Ranges
• 7961 2015May core #1281 - Modify Name of Substance.Type Property
• 8002 2015May core #1326 - Add mode parameters as a value set.
• 8043 2015May core #1368 - Change Resource Contraindication to DetectedIssue
• 8045 2015May core #1370 - Medication Prescription Status Values
• 8105 DocumentReference.format needs to be type Coding
• 8107 Update the definition of "status" for the MedicationStatement
• 8112 Recommend adding 'On-Hold' to MedicationStatement.status
• 8120 Consider Location.status "present"
• 8123 AuditEvent constraints are too tight
• 8142 2015May daf #96 - Modify Content Search Parameters
• 8163 Transaction processing sequence should reflect bundle entry sequence
• 8172 transaction-operation coding system doesn't correspond to transaction-operation value set
• 8184 Add reference to Condition
• 8188 ConceptMap structure doesn't make sense
• 8198 MAY2015 QCORE#70 - Change CommunicationRequest.orderedOn to requestedOn
• 8204 URI for Medical Device Codes defined in ISO 11073-10101 is wrong
• 8210 2015MAY QCORE#85 Goal.patient cardinality
• 8226 ValueSet.uri should be ValueSet.uri
• 8230 Display for filter-operator "=" code is " "
• 8236 terminology system URL syntax
• 8246 Signature.who can have every dataType in fhir-single.xsd
• 8253 ValueSet.compose.include should have codes or filters, but not both
• 8281 Rename ProcedureRequest.timing[x] to scheduled[x]
• 8313 Change terminology for AllergyIntolerance.type
• 8343 j.equivalence definition and valueset definition contradict each other
• 8354 ValueSet.define should be renamed to ValueSet.codeSystem
• 8355 valueOrdinal should be decimal, not integer
• 8363 No place for a displayName in SearchParameter
• 8370 We're ambiguous about allowing relative urls for reference-type search parameters
• 8372 Support multiple discharge diagnoses
• 8379 Observation indirect target is confusing
• 8386 LOINC copyright query should not allow "All" as a value
• 8416 Remove batch operations now that we have a batch interaction
• 8418 Add Period to Group Characteristic
• 8437 Remove Social Security Number from the Identifier type value set and improve definition
• 8440 Change references from Supply to SupplyRequest
- 8441 Provide support for a CodeableConcept for answer to question
- 8449 OperationOutcome.issue.code is either extendable CodeableConcept or not Code - Prefer extendable
- 8450 OperationOutcome.issue.location is unfriendly to JSON based applications only using HTTP Get parameters
- 8498 DocumentReference.format belongs inside content
- 8504 change DR.requestdetail to DR.request to harmonize with PC resources
- 8509 Conformance should have a "kind"
- 8510 Rename NamingSystem.type to NamingSystem.kind
- 8511 NamingSystem.country and .category should become useContext
- 8512 NamingSystem.category should have same binding as Identifier.type
- 8514 change name of element serviceCategory to category
- 8516 NamingSystem.country and .category should become useContext
- 8517 NamingSystem.category should have same binding as Identifier.type
- 8518 change name of element serviceCategory to category
- 8519 create and extension for O.refrange to allow for ...or equal to

All tasks (including the list above)
- Jan 2015 Ballot Comment #396
- Jan 2015 Ballot Comment #397
- Jan 2015 Ballot Comment #398
- Jan 2015 Ballot Comment #399
- Jan 2015 Ballot Comment #400
- Jan 2015 Ballot Comment #407

- Jan 2015 Ballot Comment #410
- Jan 2015 Ballot Comment #416
- Jan 2015 Ballot Comment #417
- Jan 2015 Ballot Comment #420
- Jan 2015 Ballot Comment #432
- Jan 2015 Ballot Comment #446
- Update example f201 to use dose, timing, and medication (remove the todos)
- Clarify the relationship of Medication.package and Medication.product
- Include common resource elements in resource profile definitions
- Add best practice narrative on suppressing data for client access of a resource
- Expansion and compose should allow for caseSensitive or define should loose the attribute
- Resource Ownership
- Composition.type and Composition.class definitions should be improved according to the improvements made to DocumentReference.
- create UDI examples for device
- Follow up on #3600 Change MedAdmin.dosage.site to .bodySite choice of codeableConcept|reference{BodySite}
- Be specific that JSON format must be UTF-8 just like XML
- Add 'active' On Practitioner Resource
- To add new datatype for multichannel recording data
- identifier - bring consistency to the cardinality and type across resources
- maintaining order within FHIR resources for list items
- List.flag vocabulary
- order of common resource elements not consistent
- Patient Entered/Reported Data
- Request for new security label for when content is removed from a resource for operational reasons
- Medication should be required in MedicationStatement
- MedicationStatement.wasNotGiven should notTaken
- Add "proposed" status to the Appointment resource
- MedicationAdministration.status should be marked as a modifier
- Add Organization reference to Order.source
- Need extensions for capturing formal mapping paths for data elements
- Jan 2015 Ballot Comment #455
- $translate does not suport dependsOn
- Consider Adding Precondition to MedicationStatement
- Dosage Instructions on Medication Dispense
- Are there other ways of doing UI hinting than a hierarchy in the expansion
- Do we need support for active/inactive in expansions?
- can we be more specific about date and filter parameters on expansion
- Improve documentation around value set expansion currency
- Define "all known value sets" magic URI as part of the spec
- Server Validation of CodeSystem.define.system
- Should code system name be a service provider specific identifer?
- How should display text case be handled on validate - case sensitive or not?
- Add concept map link extension
- Administration of medication to a patient
- AllergyIntolerance.event.description vs AllergyIntolerance.event.comment
- FamilyHistory negation
- Specimen needs status code
- Identification of Value Sets Used in a Profile
- typo in MedicationAdministration.dosage.rate
- MedicationAdministration.dosage.rate where no duration is needed
- MedicationPrescription.dosageInstruction.scheduled[x] naming inconsistency
- Alert should have encounter
- Add extension to link OperationOutcome and Contraindication
- Recognition in FHIR specification of profiles from other organizations
- Value set should explain how master files are handled
- Medication Package Form Codes wrong?
- Note Immunization Resource Can Record Historical Immunizations
- is Order.authority part of 80%?
- Name of MedicationPrescription
- Consider 'dateEnded' for MedicationPrescription
- Consider 'reasonEnded' codeable concept for MedicationPrescription
- Clarify MedicationStatement usage
- Invariants should be on MedicationStatement
- FHIR specification and build system must be refactored
- "Break the Glass" Method Description in Security Labels Section is Very Limiting
- allow MedicationStatement.quantity to be either a quantity or range
- Clarify boundary between MedicationAdministration and MedicationStatement
- Clarify what elements of valueSet constitute the Content Logical Definition
- hostname instead of URL for LOINC
- Relationship between child concepts and subsumption needs clarification
• 5949 relationship between dosage.text and dosage.Scheduled[x]
• 5951 Timing doesn’t allow an overall duration
• 5956 Additional Questionnaire layout hints - horizontal, autocomplete and select
• 5961 Change DiagnosticReport.name to .code
• 5965 Status values for MedicationStatement can conflict with effective[x]
• 5966 Composition section content should come before a nested section
• 5972 Weird-looking flags
• 5973 Superseded is misspelled
• 6336 "Executing an Operation Asynchronously" should be removed
• 5981 Need to be able to specify a value set identity by reference to a binding (e.g. element definition) in value set operations
• 5994 MedicationAdministration.medication description misleading
• 6000 Proposal to add _narrative parameter to REST api
• 6002 timingMax not present in Repeat element of Timing resource
• 6024 Wrong VS expansion: http://hl7.org/fhir/vs/medication-package-form-codes
• 6030 Wrong VS expansion: http://hl7.org/fhir/vs/medication-form-codes
• 6032 Wrong VS expansion: http://hl7.org/fhir/vs/medication-package-form-codes
• 6033 Wrong VS expansion: http://hl7.org/fhir/vs/medication-form-codes
• 6034 NDF-RT link on Named Systems List page 404s
• 6045 Questionnaire.$populate - subject parameter type should be Reference(Any) not Any
• 6047 Questionnaire.$populate - content parameter type should be Any, not string
• 6048 Signature should allow device resources
• 6050 Documentation of extensions for simple types
• 6051 Typos
• 6052 Expand [x] type element in profile unspecified types in the snapshot
• 6054 Expansion of ElementDefinition/ElementDefinition overlaps
• 6072 LOINC mappings for data element should be to database columns
• 6074 StructureDefinition needs a target type property
• 6081 Need rules for stringency
• 6082 Need a common extension to allow goals to be referenced from other resources
• 6083 Minimum cardinality of ProcedureRequest.subject should be 0
• 6085 Need to be able to specify a value set identity by reference to a binding (e.g. element definition) in value set operations
• 6086 Need to be able to specify a value set identity by reference to a binding (e.g. element definition) in value set operations
• 6087 No way to specify multiple bindings (with different strengths)?
• 6088 We still need Physical vs. Postal address
• 6089 We still need Physical vs. Postal address
• 6090 Need rules for stringency
• 6091 Add Device.note
• 6092 Individual Resource pages do not align with Resource names
• 6093 Differential element[x] is expanded to element
• 6094 change 'subject' search parameter
• 6095 Bundle resource has no elements that are marked as "in summary"
• 6096 Change vaccineType to vaccineCode
• 6097 Conceptmaps are not part of validation.zip
• 6098 Change vaccineType to vaccineCode
• 6099 Should have style and markup on Question.text and Group.text
• 6100 change externalFormula.rate to type quantity
• 6101 Move .enteraformula.scheduled next to .quantity
• 6102 move enteraformula.administrationinstruction to end
• 6103 provide guidance in notes section on how to use the resource for a continuous vs a bolus enteral feeding
• 6104 Tooling should enforce coding capitalization consistency
• 6105 Appointment notes section could use a diagram or two
• 6106 add a entry for a single file containing all the structure definition datatype and resource
• 6107 Add a entry for a single file containing all the structure definition datatype and resource
• 6108 open a entry for a single file containing all the structure definition datatype and resource
• 6109 broken link in patient example
• 6110 Add a entry for a single file containing all the structure definition datatype and resource
• 6111 change type from rate change from quantity to rate
• 6112 Clarify FHIR server behavior (http codes, body, outcome etc) while CREATE with id, UPDATE without id
• 6113 Clarify FHIR server behavior (http codes, body, outcome etc) while CREATE with id, UPDATE without id
• 6114 Clarify FHIR server behavior (http codes, body, outcome etc) while CREATE with id, UPDATE without id
• 6115 add elements to Address data type
• 6116 Parameters resource is missing in listings
• 6117 409 status code
• 6118 409 status code
• 6119 Content-Type, _format, accept, Accept-Charset
• 6120 Support non-atomic transactions/batches in RESTful API
• 6121 Content-Type, _format, accept, Accept-Charset
• 6122 Support non-atomic transactions/batches in RESTful API
• 6123 Support non-atomic transactions/batches in RESTful API
• 6124 Support non-atomic transactions/batches in RESTful API
• 6125 Prototyping should support additional instruction on instructions
• 6126 Make clear that RelatedPerson and Practitioner can be animals
• 6127 ValueSet profile should support additional instruction on instruction
• 6128 Change vaccineType to vaccineCode
• 6129 Change the Procedure attribute type to code
• 6130 Change attribute name for Quantity.code, Quantity.units, Quantity.system
• 6131 CarePlan could benefit from a reference to EpisodeOfCare
• Add Problem to ConditionCategory
• change "list" to "see List of Resources"
• Change 'This resource is extends resource" to 'This resource is extends the base Resource'
• move hyperlink to resources adn Capitalize
• change "concept" to "concept code" or "code"
• move hyperlink to resources and Capitalize
• change "concept" to "concept code" or "code"
• Validator not handling references to contained resources
• Resource.Id and Resource.meta not in summary
• Schema error for Age, Count, etc.
• remove table showing conformance/extensibility combinations
• typo in example
• typo in text for DomainResource Resource
• typo in text for search parameter
• typo in 6.17.5.2
• Conformance.rest.security.service should be extensible
• Does Conformence need a RevInclude list?
• Refers to StructureDefinition whereas much of the discussion is about ElementDefinition
• should this section refer to the section on revinclude?
• replace this section or refer to Bundle text from 6.8.3.5
• fix link
• correct typo
• fix typo
• 6163 no example of JSON comments found - need explicit example references or shown
• 6164 fix xml for timing datatype
• 6166 when and how to use AppointmentResponse.participantType
• 6167 need more clear clarification
• 6169 vsd 1 expansion.value for is wrong
• 6170 Clarify use of flag.category
• 6171 Flag.patient should be [0..1]
• 6172 no example for named query
• 6173 Parameters resource not listed on resource page
• 6174 add link
• 6175 change text to avoid using term 'list'
• 6176 clarify what is meant by 'subject resource'
• 6177 fix typo
• 6178 provide clarification to profile tags
• 6179 Narrow down composition.section.code value set
• 6180 Bining types need to be updated in this section
• 6181 Code restriction regex is wrong
• 6184 BCP-13 and BCP-47 should be in the coding system list
• 6187 need to also refer to both StructureDefinition and ElementDefinition
• 6188 differential between profile types is unclear
• 6189 differential view should only show what is different
• 6190 There are two Clinical Document profiles in Spec?
• 6191 broken links
• 6193 change name of section
• 6194 remove the parenthetical resources
• 6195 include reference to fulfillment of referral request
• 6196 propose boundaries for DO
• 6199 add boundaries section to DR
• 6200 remove background and context section from DR
• 6201 Add referral creation date
• 6202 redo Background and Context section
• 6205 refer to .neme which is missing
• 6207 improve the description for .event.detail
• 6208 allow Organization in flag.author
• 6209 unclear how to represent non-medical devices
• 6212 create at least example binding
• 6214 detail.product what about diet/ nutritional supplements
• 6215 roll up CarePlan.activity.detail.note into CarePlan.activity.notes
• 6216 Goal.concern reference list
• 6218 change name to sodium and 'fluid' restricted
• 6219 medication form bound to dosage route VS
• 6223 why not have a reference to the MedicationDispense Resource for reference to dosing details
• 6226 search summary table misses entry for _query
• 6229 extension definition still very hard to read
• 6233 AuditEvent confusion on 'identifier' elements that are actually strings. Affects understanding as well as search (which should not be token)
• 6234 suggestion to add a feature like _fields
• 6235 invalid namespace prefix xs:xs:Year in primitive profile XML
• 6238 is WADO-RS equivalent to " DICOM contexts " and "DICOM constructs"
• 6239 many description contain parenthetical ids - a legend would be nice to explain what they mean
• 6240 with identifier.type does is make sense to roll up multiple identifier or keep as separate identifiers
• 6241 Retrieve URI (0008,1190) is confusing name
• 6242 ImagingStudy.clinicalInformation should choose of string or Condition resource and possible code?
• 6243 procedure needs at least an example binding and should there be a choice with procedure resource
• 6244 ImagingStudy.series.instance.content comment is wrong
• 6245 suggest hyperlinks to referenced standards WADO and DICOM
• 6246 add choice ImagingObjectSelection to DiagnosticReport.imagingStudy
• 6248 add unknown to Value Set http://hl7.org/fhir/vs/animal-genderstatus and make required
• 6251 Communication.payload.content[x] definition is too narrow
• 6252 Timing.repeat.count must support ranges and decimal type.
• 6253 body site should be a datatype - but used consistently throughout the standard.
• 6256 define entity and how is different from agent
• 6257 Need additional prefixes for date search parameters
• 6258 Extension Reference to the DeviceMetric resource - Definition not needed
• 6259 constrain out Device from .device in DeviceMetricObservation profile
• 6266 Please Clarify "Data Element vs. Codes" section
• 6269 AuditEvent needs a Participant user/id type code to explain how to understand the value in user/id (e.g. Patient ID in CX form)
• 6271 Subject of flag
• 6272 IHE multiple extension point review request
• 6273 fix typo
• 6277 Minor editorial fix
• 6279 Modifier listing should be consistent all be listed in one place (split up)
• 6298 unable to review adverse event due to pub issues
• 6302 ValueSetCategory has no values listed yet is a required binding
• 6304 Abstract for Action Who/What/When/Where/Why across Resources
• 6307 Specify dot-notation for element name
• 6309 More precise definitions of some concept map equivalence codes
• 6308 Wording improvement for Extensible binding
• 6309 Allow reference to medication to be either a code or a Medication Resource Reference8112
• 6310 Add MedicationStatementStatus for planned future medications
• 6311 Need better explanation of DataElement Slicing
• 6312 Body Site used to collect specimen is part of Specimen resource not Observation
• 6313 Distinction between Observation and QuestionnaireAnswers unclear
• 6318 Bundle.entry.search.mode only captures one status
• 6320 Clarify distinction between ElementDefinition.defaultValue vs. ElementDefinition.meaningWhenMissing
• 6321 Improve the mechanism for auto-generating StructureDefinition ids in build tool
• 6324 JSON views: "canonical form" links broken
• 6325 ElementDefinition.short should not refer to "generated XML format"
• 6326 How does OperationOutcome communicate limitations imposed by security?
• 6327 Descriptions of multiple-cardinality fields should be uniformly expressed in the singular (or plural)
• 6328 Bundle.entry.resource should be defined as "Resource" (not "Resources")
• 6329 Clarify description of Bundle.entry.transaction.url
• 6330 Need a consistent way to refer to quoted values in FHIR spec
• 6331 Clarify whether conditional operations in a transaction include [base]
• 6332 Clarify the justification for requiring a "transaction" in history bundle entries
• 6333 Example reference to Binary content should use a capital "B"
• 6334 Why do Condition.onset and Condition.abatement have different datatypes?
• 6335 OperationDefinition should distinguish parameters that are Resources vs. References
• 6337 elementdefinition-examples.html should link to structuredefinition-examples.html
• 6338 Missing "raw" link for some JSON pages
• 6339 Are slicing discriminators compatible with `pattern[x]` constraints in ElementDefinition?
• 6340 How do StructureDefinitions treat [x] values?
• 6341 Slicing examples need to be updated (Observation.name no longer exists)
• 6342 Clarify the "literal" vs "logical" behavior of .in modifier for search
• 6343 The /Mailbox endpoint is no longer needed, given FHIR's "operations" framework
• 6344 Explain how to achieve the behavior or "valueBoolean" for Observations
• 6345 Clarify how DocumentReference.type and DocumentReference.class differ
• 6346 DocumentReference should have a reference to Encounter
• 6347 Timing examples should break "period+units" into two columns
• 6354 Provenance mapping to W3C specification
• 6355 Requirements column in profile spreadsheet does not get filled in for generated profile
• 6356 Improve documentation about element
• 6378 NamingSystem bundle for FHIR distribution
• 6629 Define system URLs for common coding systems
• 6630 Patient.deceased search parameter has wrong xpath
• 6637 Add modifier to string parameters to indicate what kind of partial match is required
• 6783 Add a bundle of NamingSystems for known code systems/identifiers
• 6784 2015May sdc #1 - Can answer lists be independent of questions?
• 6785 2015May sdc #2 - Multi-code system value sets are bad
• 6793 2015May sdc #10 - Use stringency, not specificity
• 6797 2015May sdc #14 - Show the actual data type for References
• 6798 2015May sdc #15 - Explain usefulness in other jurisdictions
• 6799 2015May sdc #16 - Warn about schema-centric implementation.
• 6801 2015May sdc #18 - Explain different id types
• 6803 2015May sdc #20 - Explain how ConceptMap works better
• 6807 2015May sdc #24 - Explain usage of value sets in SDC-context
• 6809 2015May sdc #26 - 404 on link to SDC wiki
• 6810 2015May sdc #27 - Explain what "options" means
• 6811 2015May sdc #28 - Can type be a code?
• 6815 2015May sdc #32 - Can root group be non-required?
• 6817 2015May sdc #34 - Add invariant on cardinality extensions to repeat
• 6819 2015May sdc #35 - Duplicate extensions
• 6821 2015May sdc #38 - Reference to Questionnaire should be profile-specific
• 6823 2015May sdc #40 - Fix indirect link
• 6826 2015May sdc #43 - Change referenced QuestionnaireAnswer resource to "QuestionnaireAnswers".

</tbody>
</table>
• 6990 2015May core #55 - Change "SearchResults" -> Bundle
• 6991 2015May core #56 - Incorrect line number for meta.lastUpdated
• 6992 2015May core #57 - Incorrect line number for base
• 6993 2015May core #58 - Incorrect line number for total
• 6994 2015May core #59 - Incorrect line number for link
• 6995 2015May core #60 - "item" should be "entry" with correct line number
• 6996 2015May core #61 - Typo in word "exist"
• 6997 2015May core #62 - Incorrect line number for id
• 6998 2015May core #63 - It would be useful to have the Update Response return an HTTP Location header with the Updated Resource's new location on the service.
• 6999 2015May core #64 - Spelling typo
• 7000 2015May core #65 - Unclosed bracket typo.
• 7001 2015May core #66 - "[Missing]" suggests the spec is incomplete.
• 7002 2015May core #67 - Use "individual resource level"
• 7003 2015May core #68 - Invariants Section content missing
• 7004 2015May core #69 - Table contains a number of values under Status with "Unknown - not stated by committee"
• 7005 2015May core #70 - Typo in word "that"
• 7006 2015May core #71 - Typo in word "is"
• 7007 2015May core #72 - TBD in table of registries
• 7008 2015May core #73 - Missing section on Canonical XML
• 7009 2015May core #74 - todo - develop this at top of section
• 7011 2015May core #76 - remove references to value set from Coding
• 7012 2015May core #78 - Missing introduction or no introduction?
• 7014 2015May core #79 - Content is "todo"
• 7015 2015May core #80 - Missing link
• 7016 2015May core #81 - Response: Happy with mandatory SSL/TLS+Server Certificate, and optional client certificate authentication.
• 7017 2015May core #82 - Spelling typo
• 7018 2015May core #83 - Response: Specifying paging support would be a welcome addition and would further increase interoperability.
• 7019 2015May core #84 - Spelling typo
• 7020 2015May core #85 - Grammar around "the criteria is expressed."
• 7021 2015May core #86 - Typo around "On"
• 7022 2015May core #87 - client makes the call, not the server
• 7023 2015May core #88 - It would be useful and informative to demonstrate how this process fulfills the original problem statement in the beginning of this section.
• 7024 2015May core #89 - Typo around "if they are do not"
• 7025 2015May core #90 - Missing content / TODO
• 7026 2015May core #91 - Disagree with timezone approach
• 7027 2015May core #92 - Missing content / TODO
• 7030 2015May core #95 - State whether translation codes are allowed and evaluated
• 7031 2015May core #96 - State whether translation codes are allowed and evaluated
• 7032 2015May core #97 - Reference to feed.category is incorrect.
• 7033 2015May core #98 - More documentation for "cert"
• 7034 2015May core #99 - Content comes from SDC
• 7036 2015May core #101 - Specification generation/tooling error
• 7038 2015May core #103 - Missing content
• 7039 2015May core #104 - List includes "Other" instead of "Basic"
• 7041 2015May core #106 - It would be helpful if this value set had a code to indicate a List is accurate within the context it is used in
• 7042 2015May core #107 - Missing content / TODO
• 7043 2015May core #107 - Add constraint around Locked Date wrt referenced versions
• 7044 2015May core #109 - Is the code list complete and sufficient?
• 7047 2015May core #112 - Explain relationship between AllergyIntolerance and RiskAssessment
• 7052 2015May core #117 - Agree, this isn't necessary.
• 7053 2015May core #118 - What is the recommended approach for recording alerts?
• 7054 2015May core #119 - Typo
• 7055 2015May core #120 - Explain how No Known Allergies is handled
• 7056 2015May core #122 - Did you consider making the status mandatory (1..1)? What does it mean when an AllergyIntolerance is returned with this field empty?
• 7058 2015May core #124 - The movement of sunlight out of this resource directly is different than the design in C-CDA design.
• 7059 2015May core #125 - Remove sentence on 5%
• 7060 2015May core #126 - Typo
• 7061 2015May core #127 - Add mime type list
• 7063 2015May core #128 - Is the person that Authored the plan always the one responsible for the plan? Would it better to say who 'wrote' the plan?
• 7070 2015May core #129 - Please add a suggested value set
• 7072 2015May core #131 - Did you consider making the title 1..1 if the section is present?
• 7073 2015May core #132 - What is the use case for not having a title?
• 7075 2015May core #134 - there's is misspelled
• 7076 2015May core #135 - Remove "are"
• 7077 2015May core #136 - resource misspelled
• 7078 2015May core #137 - whether should not be capitalized
• 7079 2015May core #138 - Copy and paste from 1.12.2
• 7080 2015May core #139 - Copy and paste from 1.12.2
• 7081 2015May core #140 - "that" should be "than"
• 7082 2015May core #141 - "an" should be "a"
• 7083 2015May core #142 - Missing "IDs"?
• 7084 2015May core #143 - Is there a need for a non-bulleted list? list-style-type:none
• 7086 2015May core #145 - Should communication also include a preferred method such as sign language, Braille, email, telephone, etc.
• 7087 2015May core #146 - Is the priority property the patient's priority or the practitioner's priority? Shouldn't both be represented as they may not be the same?
• 7088 2015May core #147 - Both example links return 404.
• 7089 2015May core #148 - "activity" should be "activities"
• 7090 2015May core #149 - "A" should be "An"
• 7091 2015May core #150 - Remove "a"
• 7092 2015May core #151 - Remove the phrase "consumer level" from the introduction.
• 7093 2015May core #152 - Remove the first occurrence of the word "a" in this sentence.
• 7094 2015May core #153 - Change semicolon to a colon, correct spelling of "differently," and add a period at the end of the sentence.
• 7095 2015May core #154 - Move the sentence to section 1.23.6.3.1, and consider expanding it.
• 7096 2015May core #155 - Change "a code" in the first sentence to "codes."
• 7097 2015May core #156 - Capitalize the abbreviation "URL."
• 7103 2015May core #162 - Wordings is over complex
• 7104 2015May core #165 - Comment on the scope of uniqueness. Globally unique or unique in the context of the sources
• 7152 2015May core #211 - To whom. Think it is usually when made available to the clinical providers. It may be available earlier within lab but not yet "verified."
• 7156 2015May core #215 - Insert "donor" after fetus
• 7157 2015May core #216 - Subject can be communicated within Observation.code
• 7158 2015May core #217 - Change "are often" to "may be"
• 7160 2015May core #219 - Explaining grouping more
• 7161 2015May core #220 - Related type is unneeded complexity
• 7167 2015May core #226 - Clarify purpose of MedicationStatement
• 7168 2015May core #227 - Loosen who can capture MedicationStatement
• 7170 2015May core #229 - Would help in the US to say this would usually be the RxNorm clinical drug code as mandated by MU regulation
• 7172 2015May core #231 - Does NutritionOrder include hyperalimentation?
• 7175 2015May core #234 - How to handle confusion between intolerance vs. preference
• 7176 2015May core #235 - How to handle confusion between intolerance vs. preference vs. excludeFood
• 7178 2015May core #237 - Distinguish what's in internal order vs. provider order (amount)
• 7184 2015May core #243 - Use route rather than enteral formula
• 7187 2015May core #246 - Add reference to panels & batteries
• 7191 2015May core #250 - Add "(revised)" for clarity after updated.
• 7193 2015May core #253 - Overlap of Procedure and Observation is going to be a problem
• 7202 2015May core #262 - Explain how terminology works with local vs. standard code sets.
• 7204 2015May core #264 - Typo - "and" misspelled in second sentence
• 7205 2015May core #265 - Don't understand code system and value set distinction
• 7207 2015May core #267 - Don't use ValueSet for answer lists
• 7210 2015May core #270 - Errors in examples.
• 7211 2015May core #271 - Don't use both SNOMED and LOINC
• 7212 2015May core #272 - No one would do this. Further the oral temperature does not literally measure anything about the body as a whole
• 7213 2015May core #273 - No one would do this either if the measure is called oral temperature
• 7214 2015May core #274 - Narrative doesn't reflect how data would be reported
• 7219 2015May core #279 - Need phase abnormal flag
• 7220 2015May core #280 - What are these symbols?
• 7222 2015May core #282 - Which are master files vs. patient-specific elements. ClinicalImpression is problematic
• 7223 2015May core #283 - Should be distinguished as a master file or knowledge base not patient specific
• 7224 2015May core #284 - Use MedicationOrder rather than MedicationRequest
• 7226 2015May core #286 - More often this will be data about a dispensing. The distinction based on how it arrived is not good
• 7227 2015May core #287 - This is described as an issues at to whether it should be separate
• 7229 2015May core #289 - Use medicationRequest rather than MedicationRequest
• 7230 2015May core #290 - The LOINC code for blood culture is 600-7 Bacteria identified in Blood by Culture
• 7231 2015May core #291 - Don't use both SNOMED and LOINC
• 7232 2015May core #292 - "entire body" is a bad example
• 7233 2015May core #293 - Fix examples to show pre-coordinated formula
• 7234 2015May core #294 - Use LOINC instead of SNOMED
• 7237 2015May core #297 - Errors in examples
• 7243 2015May core #303 - Don't know what is included
• 7244 2015May core #304 - presume this relates to the so called segmented privacy, that will be a nightmare and could be glue to the wheels of care. Would try to avoid it.
• 7249 2015May core #309 - Need more background on parallels of messaging w/ v2
• 7257 2015May core #447 - No content is provided in this section
• 7259 2015May core #449 - The error code and any recommendations on OperationOutcome should be specified
• 7261 2015May core #451 - No content is provided in this section
• 7262 2015May core #452 - No content is provided in this section
• 7265 2015May core #455 - contains route codes instead of the intended medication form codes
• 7266 2015May core #456 - contains route codes instead of the intended package codes
• 7269 2015May core #459 - Need a definition from Lloyd
• 7270 2015May core #460 - The link is critical in order to know what the requirement is.
• 7276 2015May core #446 - Typo
• 7271 2015May core #461 - I am unsure as to the intention of this note, but it does not seem to match the example
• 7272 2015May core #462 - The line number references in the notes do not seem to match the example
• 7273 2015May core #463 - Typo
• 7274 2015May core #464 - Missing closing parenthesis at end
• 7275 2015May core #465 - Line number reference is incorrect
• 7276 2015May core #466 - lastUpdated (line 12) - if present, this must match the value in the HTTP header
• 7277 2015May core #467 - server is spelled wrong
• 7278 2015May core #468 - Typo
• 7279 2015May core #469 - How is resource contention handled on delete?
• 7280 2015May core #470 - More explanation on client-assigned ids8082
• 7282 2015May core #472 - Typo
• 7284 2015May core #474 - No content is provided in this section
• 7285 2015May core #475 - No content is provided in this section
• 7288 2015May core #478 - No content is provided in this section
• 7289 2015May core #479 - Verify security risks are handled in stylesheet
• 7290 2015May core #480 - Content is needed
• 7301 2015May core #491 - Make birthDate a dateTime
• 7303 2015May core #493 - There may be more than one dietary preference restriction
• 7304 2015May core #494 - There may be more than one diagnosis on discharge
• 7305 2015May core #495 - admit diagnoses are important, particularly in the cases where the patient may have not be discharged yet.
• 7307 2015May core #497 - Consider adding birthDate dateTime to resource, just as it is in the Person resource. Ager of the individual involved in the care could be important
• 7311 2015May core #501 - Keep birthDate data type consistent with the Person resource
• 7312 2015May core #503 - No guidance provided on Messaging subscription
• 7340 2015May core #530 - Example links are broken.
• 7345 2015May core #535 - Require server behavior for merged patients.
• 7346 2015May core #536 - Make the address search parameter its own type with subdivisions rather than simply a string.
• 7347 2015May core #537 - Schedule.actor has resource type of "Any"
• 7348 2015May core #538 - participant.actor should be required
• 7349 2015May core #539 - Not all of CCDA has been incorporated yet.
• 7351 2015May core #541 - Add ambulatory care to list of contexts
• 7352 2015May core #542 - Merge first paragraph of 1.7.2.2 into 1.7.2.1. and eliminate second paragraph
• 7353 2015May core #543 - Use a better comparison than folders
• 7354 2015May core #544 - Typo extraneous "is." Also suggest capitalizing and making the link more explicit (to Base Resource).
• 7355 2015May core #545 - Wording is confusing on common properties
• 7356 2015May core #546 - Don't use "may not"
• 7357 2015May core #547 - Typo
• 7358 2015May core #548 - Don't list CCD, say "implementation guide" instead of profile
• 7359 2015May core #549 - What is the answer then? Shouldn't there be testing tools that can check complete conformance to the FHIR spec, as well as to specific FHIR Profiles?
• 7360 2015May core #550 - Need to see isModifier=true in the instance
• 7362 2015May core #552 - Expand on life-cycle
• 7363 2015May core #553 - Use "life cycle" instead of "pattern"
• 7364 2015May core #554 - Drop life-cycle table until there are more definitions
• 7365 2015May core #555 - Change "from" to "to"
• 7366 2015May core #556 - Why not avoid this problem by requiring contained resources to explicitly state their subject? Why allow this degree of optionality?
• 7367 2015May core #557 - Clarify use of "Medication" as non-patient-specific
• 7368 2015May core #558 - Narrative should contain all human-relevant discrete data
• 7370 2015May core #560 - How is list narrative made non-redundant if generated?
• 7371 2015May core #561 - Narrative only shouldn't be a List
• 7372 2015May core #562 - See my comment on 6.1.5 -- it does not make sense to call these types of narrative a "List."
• 7373 2015May core #563 - Is "instant" needed?
• 7374 2015May core #564 - Clarify reference to contained extension
• 7375 2015May core #565 - Typo
• 7376 2015May core #566 - MedicationPrescription "anti-prescription" example has a typo in its first tag, and has as the ending tag.
• 7377 2015May core #567 - Typo
• 7378 2015May core #568 - Rename "Specification Map" to "Table of Contents"
• 7379 2015May core #569 - Be explicit that Composition doesn't contain content. Also note that it establishes context.
• 7380 2015May core #570 - Typo
• 7381 2015May core #571 - How are lawn mowing services healthcare related?
• 7382 2015May core #572 - "a single" is too limiting and does not fit the examples.
• 7384 2015May core #574 - I think it's important to be explicit about how to know the difference between proposals and actual orders, so I suggested the additional wording.
• 7385 2015May core #575 - From previous ballot, enter something about 162, 176, 177, 183, 187
• 7386 2015May core #576 - Differentiate "doesn't have" from "refuted"
• 7387 2015May core #577 - Add link to documents from Resources page under "Documents & Structure" heading
• 7388 2015May core #578 - Soften language on presentation of the document changing.
• 7392 2015May core #582 - Reword definition
• 7393 2015May core #583 - Remove "final mode" and clarify description of changes list.
• 7394 2015May core #584 - Where is narrative found in a resource?
• 7395 2015May core #585 - Saying "base" resource could be confusing since there is a specifical "Base Resource" section (1.10) in the FHIR spec.
• 7396 2015May core #586 - Typo
• 7397 2015May core #587 - Remove (or deprecate) this from the Basic Resource Types value set because Slot is already a FHIR resource in the Scheduling/Ordering category.
• 7398 2015May core #588 - Link is broken, sentence is confusing
• 7399 2015May core #589 - Typo
• 7401 2015May core #591 - Distinguish "element" vs. "backbone element"
• 7402 2015May core #592 - The URL does not work, produces an HTTP 404 error.
• 7403 2015May core #593 - Description of the rules on human-readable text aren't completely accurate
• 7404 2015May core #594 - Is narrative the same for documents vs. other mechanisms?
• 7405 2015May core #595 - Example implies MedicationStatement is a summary, when summary is List
• 7407 2015May core #597 - CarePlanActivityCategory shouldn't be required
• 7408 2015May core #598 - Typo
• 7410 2015May core #600 - Suggest providing a clarification to explicitly allow deprecation (sometimes it just makes sense).
• 7411 2015May core #601 - Typo
• 7412 2015May core #602 - ToC links to wrong page
• 7413 2015May core #603 - Typo, phrase is vague
• 7414 2015May core #604 - How does OperationOutcome represent business issues?
• 7415 2015May core #605 - ToC links to wrong page
• 7417 2015May core #607 - ToC links to wrong page
• 7418 2015May core #608 - Contradiction in definition of Device.location
• 7420 2015May core #610 - ToC links to wrong page
• 7421 2015May core #611 - Typo
• 7422 2015May core #612 - Typo
• 7423 2015May core #613 - Typo
• 7426 2015May core #714 - Reference any resource in Document manifest
• 7427 2015May core #715 - Reference any resources in Document manifest
• 7428 2015May core #716 - Using of Snomed CT
• 7400 2015May core #590 - It does not say where to submit the request for a new code. FHIM Management Group? Vocabulary WG? Where? I suggest that be included in the text.
• 7429 2015May core #717 - Using of Snomed CT
• 7430 2015May core #718 - Harmonization with ISO EN 13606
• 7431 2015May core #719 - AuditEvent source identifier
• 7438 2015May core #726 - Provide help text for flags column
• 7439 2015May core #727 - Typo
• 7440 2015May core #728 - hyperlink is to #modifier, but that does not exist on this page….probably should be to #1.16.0.2
• 7441 2015May core #729 - hyperlink is to seatch.html#mustSupport, but that does not exist on this page….probably should be to #2.1.1.4.7
• 7444 2015May core #732 - …except… except what? Seems like there is something missing from the sentence
• 7445 2015May core #733 - nice file cabinet, folder, versioning analogy, but think that read needs to specify it gets the paper from the top of the folder
• 7446 2015May core #734 - missing a space between appropriate and cabinet
• 7447 2015May core #735 - resource instead of resource
• 7448 2015May core #736 - Need life-cycle declared everywhere
• 7450 2015May core #738 - How is unknown extensions support declared?
• 7452 2015May core #740 - How do we avoid duplicate extensions?
• 7454 2015May core #742 - Can only one be declared as primary? Can none?
• 7456 2015May core #744 - The existing text seems to have a sentence fragment and the meaning is unclear.
• 7457 2015May core #745 - should allow for multiple Coding returned, with at most one marked as primary
• 7459 2015May core #747 - Why are_text and _filter missing?
• 7460 2015May core #748 - Allow non-resources to be focus of Provenance
• 7463 2015May core #751 - patient compartment should be lowercase patient, not uppercase Patient, which would be the resource.
• 7464 2015May core #752 - "patient" has wrong case
• 7466 2015May core #754 - Don't snip narrative
• 7468 2015May core #756 - Explain issues around cross-origin resource sharing
• 7469 2015May core #764 - Typo-Binding Definitions
• 7470 2015May core #765 - Finding the Table of Contents and Section numbers
• 7471 2015May core #766 - Clinical Resources vs. Administrative Resource
• 7472 2015May core #767 - Problems with the section "Mixing Custom and Standard Terminologies"
• 7473 2015May core #768 - Permit a code for a MedicationStatement is a summary, when summary is List
• 7474 2015May core #772 - Guide to Resources needed
• 7477 2015May core #778 - consistent of FamilyMemberHistory's condition with the Condition resource
• 7479 2015May core #779 - Clarify Data Element Boundaries and Relationships
• 7485 2015May core #780 - Typos in Data Elements vs. Codes
• 7487 2015May core #782 - Suggested grammar fix in 6.21.8.1
• 7488 2015May core #783 - Clarification needed on the use of Data Element with other resources
• 7489 2015May core #784 - Typo in 1.23.0.1
• 7490 2015May core #785 - Grammar in 1.23.0.1
• 7491 2015May core #786 - Typo
• 7620 2015May core #911 - Are Condition.stage, evidence, dueTo and occurredFollowing in the 80%?
• 7621 2015May core #912 - Aren't these all similar items? Shouldn't they all be called target or detail?
• 7622 2015May core #913 - Allow structures in notes, make 0..*
• 7626 2015May core #917 - ContactPoint should provide a 'rank' attribute
• 7629 2015May core #920 - Suggest renaming to 'bodySite' or 'affectedSite'
• 7630 2015May core #921 - Suggest renaming to 'targetBodySite'. There may be other body sites associated with procedure (e.g., approachBodySite)
• 7631 2015May core #922 - Procedure.device -> targetDevice
• 7633 2015May core #924 - Procedure has evolved since ProcedureRequest was drafted. Suggest re-aligning the two resources to account for changes in one, relevant to the other.
• 7634 2015May core #925 - Procedure.notes is 0..1. ProcedureRequest.notes is 0..*. Suggest updating both resources based on comment number 19.
• 7636 2015May core #927 - Should 'applies' be renamed to 'physiologicallyRelevant[x]'? While short names are good, they must also be more descriptive.
• 7639 2015May core #930 - What's difference between has component and has member?
• 7640 2015May core #931 - Align prescription.status with other resources (e.g. Planned, proposed)
• 7647 2015May core #938 - Recommend renaming to administrationSite
• 7650 2015May core #941 - Typo
• 7651 2015May core #942 - Need to categorize re-admissions
• 7652 2015May core #943 - Extra 'is'.
• 7653 2015May core #944 - Bindings aren't mutually exclusive
• 7654 2015May core #945 - Dietary preference to 0..*
• 7655 2015May core #946 - Recommend renaming this to referralRequestFulfilled
• 7659 2015May core #950 - Where are the present-on-admission diagnoses?
• 7660 2015May core #951 - Why is this 0..1? Are all the other discharge diagnoses supposed to be elsewhere, e.g., under reason?
• 7662 2015May core #953 - How is a diagnostic report not a diagnostic report?
• 7663 2015May core #954 - Explain most common types of data exchange
• 7669 2015May core #960 - Reading through the resource description, it's still unclear how to represent an appointment request. Please clarify.
• 7670 2015May core #961 - Differentiate ReferentRequest and AppointmentRequest
• 7672 2015May core #963 - Please populate the actual value set or at least provide a good set of examples based on the logical specification of the value set.
• 7678 2015May core #969 - The text says the contextType shall always be populated, but the definition has it as optional
• 7680 2015May core #970 - Please update use case. From a clinical perspective performing a CT scan for further investigation of an elevated PSA level would be unusual.
• 7681 2015May core #972 - In three cases Retrieve URL maps to the DICOM attribute (0008,1190). Do we really need 4 Retrieve URIs for the ImagingObjectSelection resource?
• 7682 2015May core #973 - Need to reference key images too
• 7684 2015May core #975 - Need to distinguish pathologist from technologist comments
• 7687 2015May core #978 - Add authorization qualifier to 'history'
• 7693 2015May core #984 - Who or what should sign a bundle and how is this used? RBAC? What happens if a transaction is not signed?
• 7694 2015May core #985 - Summary says 9 mandatory elements, but only see 1
• 7696 2015May core #987 - Please write this section.
• 7702 2015May core #993 - Can signature be captured by blob?
• 7729 2015May core #1020 - Suggest updating the name of this grouping so it does not conflict with the proper grouping for Medications and Immunizations.
• 7731 2015May core #1022 - Possible additional text for improved understanding.
• 7732 2015May core #1023 - Clarification
• 7733 2015May core #1024 - Missing attribute?
• 7734 2015May core #1025 - Suggest update definition.
• 7735 2015May core #1026 - Clarification
• 7736 2015May core #1027 - Seeking clarification.
• 7737 2015May core #1028 - Suggest adding more info in the comment.
• 7739 2015May core #1030 - If a system wants to communicate the manufacturer, brand, form, packaging, etc., they Should use the full Medication Resource.
• 7743 2015May core #1034 - Suggest updating this introduction text and fixing the link to the example SNOMED CT value set.
• 7744 2015May core #1035 - Suggested edit removed parens.
• 7745 2015May core #1036 - Fix typo
• 7746 2015May core #1037 - Fix the link
• 7750 2015May core #1071 - Rationalize the design of Provenance Resource and decouple from AuditEvent.
• 7751 2015May core #1072 - Replace Provenance extension
• 7753 2015May core #1074 - The use of the DocumentReference.confidentiality element is not conformant with the HCS requirements on Security Labels. This needs to be fixed.
• 7757 2015May core #1078 - Add David Hays excellent description of the Operations Framework to the top of operations.html.
• 7759 2015May core #1080 - It is not clear where CORE extensions begin, DAF extensions begin and QiCore extensions begin
• 7760 2015May core #1081 - Add dependsOn element as an input Parameter with parts, and product as an output Parameter with parts.
• 7761 2015May core #1082 - Allow ConceptMap/Stranslate to have multiple outcomes
• 7765 2015May core #1086 - Harmonize AllergyIntolerance.event, Contraindication and Immunization.reaction
• 7779 2015May core #1100 - Epub is corrupted
• 7782 2015May core #1103 - Default cardinality of ElementDefinition min and max is undefined
• 7785 2015May core #1106 - Make sections of the full table of contents expandable/contractible
• 7786 2015May core #1107 - Need best-practice documentation for creating profiles
• 7787 2015May core #1108 - Need to create and document processes for achieving interoperability using FHIR
• 7788 2015May core #1109 - The normative information on a profile needs to be separable from the rest of FHIR
• 7795 2015May core #1117 - In profiles, a better way to constrain resource references is needed.
• 7796 2015May core #1118 - No way to restrict Resource(Any)
• 7797 2015May core #1119 - Concept look up operation may duplicate functionality
• 7799 2015May core #1121 - Need to list complete rules of what is allowed/not allowed for overrides in derived profiles (cardinality, type, etc.)
• 7980 2015May core #1300 - The phrase literal isn't used until the "Business Identifier" section and it's unclear whether the spec is referring to id or identifier.
• 7981 2015May core #1301 - Typo
• 7982 2015May core #1302 - A simple example, or reference to search, on howto acces by business identifier rather than literal resource id might help the new reader.
• 7983 2015May core #1303 - Please spell PI out. Protected information?
• 7984 2015May core #1304 - Does this mean OperationOutcome .issue.severity cannot = error? Why?
• 7985 2015May core #1305 - Typo
• 7986 2015May core #1306 - If possible, add link also.
• 7988 2015May core #1312 - Did you consider creating a diagram for this section?
• 7989 2015May core #1313 - Which status corresponds to admitted?
• 7990 2015May core #1314 - Clarify search returns
• 7991 2015May core #1315 - Does including this in a ballot upgrade the status to proposed? Where can folks track the discussion on this resource?
• 7992 2015May core #1316 - The examples in other spots are very helpful
• 7993 2015May core #1317 - The examples in other spots are very helpful
• 7994 2015May core #1318 - How did the authors decide to include 'to 2 significant figures'? In the next row it states 'to 4 significant figures'.
• 7995 2015May core #1319 - Allow a codeableConcept in addition to the ability to reference Medication Resource. It’s very common to just record the medication code.
• 7997 2015May core #1321 - Please add an example.
• 7998 2015May core #1322 - The other sections use the first sentence to define the parameter -- would be great to follow pattern here.
• 7999 2015May core #1323 - Just trying to highlight difference with parallel sentences.
• 8001 2015May core #1325 - Typo
• 8002 2015May core #1326 - Add mode parameters as a value set.
• 8003 2015May core #1327 - Add examples for FHIR operations
• 8004 2015May core #1328 - Add example for code:in
• 8013 2015May core #1338 - When would you ever record a MedicationStatement without a patient?
• 8014 2015May core #1339 - Where would you put a free text SIG? Please include guidance somewhere on this page: /medicationstatement-definitions.html#MedicationStatement.note
• 8015 2015May core #1340 - Did you consider allowing a link between MedicationPrescriptions when the status is superceded?
• 8019 2015May core #1344 - Typo
• 8020 2015May core #1346 - Please add detail on when you expect to just use the MedicationPrescription.dispense vs the full MedicationDispense resource.
• 8022 2015May core #1347 - The value set appears to be route codes. Please update to be medication codes. Linked to the page from Medication. code: /medication.html
• 8023 2015May core #1348 - How did you decided to include this field? Isn't this available through the Medication.code and/or Medication. package?
• 8024 2015May core #1349 - Not clear what framework is referenced here?
• 8026 2015May core #1351 - Clarify resource inclusion in document bundle
• 8027 2015May core #1352 - How would a stylesheet render a document unsafe if it doesn’t alter the presentation? Is a common stylesheet supplied?
• 8028 2015May core #1353 - Link to “Profile Tags” is incorrect - takes you to compartment based access Why wouldn’t you use the meta tag in the composition resource?
• 8032 2015May core #1357 - Code inconsistent
• 8034 2015May core #1359 - Occurrence misspelling
• 8041 2015May core #1366 - Add "and extended with metadata in the HL7 Value Set Definition specification"
• 8042 2015May core #1367 - Do not understand the use case driving this, nor the need for the recursive containment. Remove.
• 8043 2015May core #1368 - Change Resource Contraindication to DetectedIssue
• 8044 2015May core #1369 - effective date range for the communication
• 8045 2015May core #1370 - Medication Prescription Status Values
• 8046 2015May core #1371 - Add URI for NDC (National Drug Code)
• 8047 2015May core #1372 - Add URI for NPI (National Provider ID)
• 8049 2015May core #1374 - Support XHTML narrative in extensions
• 8051 2015May core #1376 - Link broken
• 8053 2015May core #1378 - Link broken
• 8054 2015May core #1434 - Why is the patient reference called patient in some resources and subject in others? Should be consistent where possible.
• 8055 2015May core #1435 - Typo
• 8056 2015May core #1436 - Typo
• 8057 2015May core #1437 - Make Composition.class and DocumentReference.class extensions
• 8058 2015May core #1438 - Make clear that Procedure.device includes implanted devices
• 8060 2015May core #1440 - Re-word for clarity
• 8061 2015May core #1441 - MedicationFormalRepresentation - Link to valueset for medication codes points to value set contents for route of administration.
• 8062 2015May core #1442 - MedicationForm - Link to value set for medication codes points to value set contents for route of administration.
• 8063 2015May core #1443 - MedicationContainer - Link to value set for medication codes points to value set contents for route of administration.
• 8064 2015May core #1444 - Medication.code - Reference points to value set contents for route of administration.
• 8065 2015May core #1445 - Medication.product.form- Reference points to value set contents for route of administration.
• 8066 2015May core #1446 - Medication.package.container - Reference points to value set contents for route of administration.
• 8067 2015May core #1447 - medicine -> medication
• 8074 2015May core #1454 - Concerns for FamilyMemberHistory
• 8079 2015May core #1461 - More structured approach to conformance resource
• 8080 2015May core #1462 - FHIR section 6.1.3 does not describe all UML classes
• 8081 2015May core #1463 - The concept of profile needs further consolidation
• 8082 2015May core #1464 - What is difference between a profile and implementation guide
• 8083 2015May core #1465 - Create best practice wording on how to deal with large scale OID URI strategy
• 8102 2015May core #1467 - Fix description of Timing datatype components: frequency and frequencyMax
• 8105 DocumentReference.format needs to be type Codeing
• 8107 Update the definition of "status" for the MedicationStatement7913
• 8110 When "To many codes to display (>10000)" , show "some" of them
• 8111 Clarify description of OperationDefinition.idempotent
• 8112 Recommend adding 'On-Hold' to MedicationStatement.status
• 8113 Need additional documentation on List resource about List semantics
• 8114 FamilyMemberHistory.deceased[x] documentation typo
• 8115 "Example" appears on the description of the Condition-Category valueset even though the values are required if used
• 8118 Correct typos in Service Root URL
• 8120 Consider Location.status "present"
• 8121 Allow additional search results when an advanced search algorithm is available
• 8122 Definition of neutered only covers male animals
• 8123 AuditEvent constraints are too tight
• 8124 Clinical Resource categories
• 8125 2015May daf #5 - Missing Concept Display Name
• 8126 2015May daf #26 - Expand value set
• 8127 2015May daf #27 - Profile title suggestion
• 8128 2015May daf #28 - Profile title suggestion
• 8129 2015May daf #36 - Profile title suggestion
• 8130 2015May daf #45 - Profile title suggestion
• 8131 2015May daf #48 - Duplicate Section Titles
• 8142 2015May daf #96 - Modify Content Search Parameters
• 8143 2015May daf #106 - MedicationPrescription.dispense.numberOfRepeatsAllowed
• 8144 2015May daf #106 - Provide wording to distinguish severity & criticality
• 8145 2015May daf #167 - Notes should be 0..* rather than 0..1
• 8150 2015May daf #181
• 8154 2015May daf #192 - Incorrect encoding of units in SCT
• 8155 2015May daf #210
• 8156 2015May daf #211 - Broken link: http://www.hl7.org/FHIR/2015May/QICoreMedicationCodes.html#1.23.2.1.2088
• 8157 Brokent Link on extensibility Page.
• 8159 word clarify
• 8160 Procedure missing value sets
• 8162 "Complete Conformance Statement" is incomplete
• 8163 Transaction processing sequence should reflect bundle entry sequence
• 8164 allow batch delete for conditional DELETE operation if multiple match
• 8165 2015May core #975b - Add authorization qualifier to 'read'
• 8166 Order should have a search parameter "identifier"
• 8167 What to do when I encounter unknown elements in a FHIR payload?
• 8168 Small typo in ConceptMap detailed description
• 8169 Profile HTML pages should have default values from base resources grayed out if missing in differential
• 8170 transaction-operation coding system doesn't correspond to transaction-operation value set
• 8171 Typo on REST/API page
• 8172 xsd:decimal precludes implied precision
• 8176 Typo on REST/API page, conformance operation
• 8177 change administrationinstructions to administrationinstruction (remove s)
• 8178 fix dangling references to web categories in security labels page
• 8179 also change .scheduled to schedule for consistency (remove d)
• 8180 schedule[x] (dateTime|Period|Timing) can be just schedule (Timing)
• 8183 Add mode of encounter
• 8184 Add reference to Condition
• 8185 Change DO .item.code and DR .name valueset binding to Example
• 8186 Identifier Type needs to use internally defined codes
• 8187 Correct Language about outcome of translation operation
• 8188 ConceptMap structure doesn't make sense
• 8189 Dead link to Profile Tags
• 8190 BindingStrength of FamilyMemberHistory.condition.outcome is UNKNOWN
• 8191 2015May QICore #34 - Unreadable documentation page
• 8195 2015May QICore#61- Broken "link-to-here"
• 8196 2015May QICore #62-63 - Show value set and strength instead of binding name
• 8197 MAY2015-QICore #70 - Change CommunicationRequest.orderedOn to requestedOn
• 8198 MAY2015-QICore #84 - Null values for modifying attributes?
• 8199 Questionnaire.group.question missing validation
• 8200 URI for Medical Device Codes defined in ISO 11073-10101 is wrong
• 8201 2015May QICore#85 Goal.patient cardinality
• 8202 Make clear separation of recommendation and plan in CarePlan
• 8203 Add unavailable as list empty reason
• 8204 Device Scope nad Usage needs editing
• 8205 ValueSet.url should be ValueSet.uri
• 8206 How to represent a range of infusion rates?
• 8207 Display for filter-operator "=" code is ""
• 8208 Add ImagingStudy element to ImagingObjectSelection
• 8209 Add searchRevInclude to Conformance
• 8210 What are "the standard search parameters"
• 8211 Return behaviour of named queries: Bundle or Parameters
• 8212 terminology system URL syntax
• 8213 MedicationAdministration.dosage.rate clarification
• 8214 fix typo in updates page
• 8215 2015May daf #104 - Update Data Types Timing.code value set
• 8216 2015May daf #94 - Add preferred binding to condition.severity
• 8217 Signature.who can have every dataType in fhir-single.xsd
• 8247 Invariants not showing up on Element
• 8248 CliniciansonFHIR: Care Plan status value set
• 8249 CliniciansonFHIR: Care Plan reference Care Plan
• 8252 CliniciansonFHIR: Care Plan roles
• 8254 CliniciansonFHIR: Goal - link to goal observation
• 8256 CliniciansonFHIR: Goal Status Value
• 8258 iniciansonFHIR: Goal with computable < and >
• 8261 Procedure Resource need to reference referral
• 8262 2015May daf #50 - FHIR Version Number
• 8263 2015May daf #54 -Title: Extension: Data Absent Reason
• 8265 ValueSet.compose.include should have codes or filters, but not both
• 8270 ValueSet observation-values has no codes as defined
• 8271 Value set specimen-collection-priority references nonsensical code system www.example.com
• 8272 CarePlan Definition - how zero or more providers in a team with the person/patient intend to guide care.
• 8277 Add a value for Clinical Research Sponsor to Organization type Value Set
• 8281 Rename ProcedureRequest.timing[x] to scheduled[x]
• 8283 Typos on Inter-Version Compatibility page
• 8284 Profile vs StructureDefinition on Conformance rules
• 8285 Profiling examples are still DSTU1
• 8286 Slicing entry needs to repeat full definition, not only root
• 8287 Profile to StructureDefinition
• 8288 Profile still used as example
• 8289 Typo in Life Cycle page
• 8290 Typo in narrative page
• 8291 Typo overview clinical page
• 8293 Typo in overview page
• 8295 Typo on profiling page
• 8296 New explanation for discriminator
• 8297 Typo in references page
• 8298 Typo on references page
• 8300 unclear about language tag on resource page
• 8301 Typo on updates page
• 8303 ValueSet expansion in parameters clarification
• 8306 Change binding of EnteralRouteOfAdministration from required to extensible
• 8307 Canonical url name clash "http://hi7.org/fhir/StructureDefinition/cda-inFullFulFillmentOf"
• 8308 Add FMM gradings, and give all resources a FMM level
• 8309 Constraints can be used to constrain extensions too
• 8310 Constraining to max=1 in profile loses information
• 8311 Small errors in StructureDefinitions for primitives
• 8313 Change terminology for AllergyIntolerance.type
• 8314 Logical table icon for Bundle incorrect
• 8315 Guidance on "Care Team"
• 8319 adjust wording for bundle.entry.transaction.url
• 8321 Extensibility documentation should explain representation for primitive data types in JSON
• 8322 Bad Link
• 8323 DiagnosticReport vs Composition - How are they related/different?
• 8324 Add "component" to ValueSet http://hl7.org/fhir/goal-relationship-type
• 8325 Add reference from Communication --> CommunicationRequest
• 8326 Example uses an invalid element name 'dob'
• 8327 2015May QiCore #56 - Make Procedure.status field isModifier
• 8328 value-set code generator creates duplicate line for the profile within the meta tag
• 8329 Refine explanation of $Translate for non-map assertions
• 8333 Missing Examples for other usage identified
• 8337 Value set manifestation-c-cda-codes has no codes as defined
• 8338 Description of Condition/Problem/Diagnosis Codes off Condition.category has redundant "condition"
• 8339 Allow a server to specify that eTags are required for updates
• 8341 conformance versioning detail not consistent
• 8342 include the option for a client to specify whether the updated resource is to be included in a transaction response
• 8343 .equivalence definition and valueSet definition contradict each other
• 8345 Support MedicationPrescription.dosageInstruction.rate as a Quantity
• 8352 2015May QiCore #65 - Copyright Statement not appearing in generated valueset HTML page
• 8353 Non-resource-specific pages should include responsible WG
• 8354 ValueSet.define should be renamed to ValueSet.codeSystem
• 8355 valueOrdinal should be decimal, not integer
• 8356 Add a note about ordinals and reference to extension on Questionnaire
• 8357 Extension display doesn't show cardinality for extension
• 8359 ATNA REST action codes do not cover DSTU2 operations
• 8360 Clarify Condition.code and evidence
• 8363 No place for a displayname in SearchParameter
• 8365 Relative URLs in reference search parameter
• 8366 "it's" vs "its"
• 8367 We're ambiguous about allowing relative urls for reference-type search parameters
• 8368 content-type=application/x-www-form-urlencoded
• 8372 Support multiple discharge diagnoses
• 8376 Encounter participant type value set - add addtl V3 ParticipationType codes
• 8379 Observation indirect target is confusing
• 8381 Extend OrganizationType to include other commercial types
• 8382 Incorrect code in patient-example.xml
• 8386 LOINC copyright query should not allow "All" as a value
8388 doc-typecodes filter value for LOINC should match case with LOINC db
8389 Create codes in special value code system for "L" (below detection limit) and "U" (above detection limit)
8393 Operations defined on profiles do not work
8394 Conformance.security search param path is wrong
8395 Error First child element must be of type... when defining a nested complex type extension
8396 json-edge-cases.js json is invalid
8397 MedAdmin clarifications needed
8399 observation-methods includes an invalid filter for LOINC
8401 Add ConceptMap search parameter for sourceUri
8403 Need 21090 ordinal extension on Coding
8407 Add AllergyIntolerance.onset
8408 Add identifier field to search parameters for Procedure resource
8416 Remove batch operations now that we have a batch interaction
8417 Concept Designation Use binding - clarify SCT licensing issues
8418 Add Period to Group Characteristic
8419 adjust binding strength of DocumentReference value sets
8421 Conflicting advise in ValueSet expansion and define/compose
8423 Care Plan Status missing draft and cancelled(or similar)
8426 What is the effect of operations on _history?
8427 Custodian of a Resource should be accessible through Provenance
8429 $everything operation support _include directive?
8430 Clarify how non-transaction/batch Bundle posts work when sent to the base URL
8431 add Signature to the datatype graphic on the top of the datatype page
8432 Add Encounter to MedicationStatement
8433 Add "logical" to StructureDefinition.kind
8434 Document content expectations too tight
8437 Remove Social Security Number from the Identifier type value set and improve definition
8438 Add identifier systems to the system list
8439 Add a value set for yes/no/don't know (common questionnaire combination)
8440 Change references from Supply to SupplyRequest
8441 Provide support for a CodeableConcept for answer to question
8444 Test Script should note relationship to other resources
8446 typo in narrative for mode - create
8449 OperationOutcome.issue.code is either extendable CodeableConcept or not Code - Prefer extendable
8450 OperationOutcome.issue.location is unfriendly to JSON based applications only using HTTP Get parameters
8452 Add StructureDefinition.invariants
8454 Support for multiple authors and sections they've completed
8455 Provide support for other roles involved in questionnaire/assessment completion
8456 Inconsistent extension element links
8457 Add section on IP considerations
8466 Allow Communication resource to have Group as a recipient
8469 StructureDefinition notes refer to "type" instead of "contextType"
8470 Rendering of extensions includes a 'Summary' with no content
8471 StructureDefinition.context needs a clearer definition
8473 When StructureDefinition.contextType is 'extension', rules are unclear
8474 Condition laterality
8479 Remove Observation.value[x] binding
8480 Rename QuestionnaireAnswers to QuestionnaireResponse
8481 Don't force use of ValueSet for questionnaire question choices
8482 Criticality terminology for AllergyIntolerance resource
8483 Update element description for ElementDefinition.type.profile
8485 published xml extensions missing "-->" 8486 DataElement should have stringency as a search criteria
8487 Need a system url for mime type
8488 The presentation of Goal is not clear
8490 Timing documentation is out of date
8492 Searching for codes by valueset should use ValueSet.url
8494 QI-Core and CQF are two non-names for QICore
8495 HealthcareService missing Identifier search property
8497 valueset-c80-doc-classcodes should include four missing C-CDA document-level codes
8498 DocumentReference.format belongs inside content
8499 DocumentReference: "Document Formats" section is out of date
8500 Profile schematron rules do not trigger
8501 Document the "system" for Patient.communication.language
8502 MedicationAdministration rate changes
8504 change DR.requestdetail to DR.request to harmonize with PC resources
8505 add choice of ProcedureRequest and ReferralRequest to DR.requestDetail
8508 Invariant rules in profiles not populated in schematron files
8509 Conformance should have a "kind"
8510 Rename NamingSystem.type to NamingSystem.kind
8511 NamingSystem.country and .category should become useContext
8512 NamingSystem.category should have same binding as Identifier.type
8514 change name of element serviveCategory to category
8520 Duplicate profile ids overwrite
8521 Questionnaire Extension defaultasfixed - clarification
8522 The Questionnaire parameter on the $populate operation should permit by reference
8523 add choice of ProcedureReequest and ReferralRequest to DR.requestDetail
8524 Invariant rules in profiles not populated in schematron files
8525 Conformance should have a "kind"
8526 Put value set for yes/no/don't know (common questionnaire combination)
8527 Custodian of a Resource should be accessible through Provenance
8529 $everything operation support _include directive?
8530 Clarify how non-transaction/batch Bundle posts work when sent to the base URL
8531 add Signature to the datatype graphic on the top of the datatype page
8532 Add Encounter to MedicationStatement
8533 Add "logical" to StructureDefinition.kind
8534 Document content expectations too tight
8537 Remove Social Security Number from the Identifier type value set and improve definition
8538 Add identifier systems to the system list
8539 observation-methods includes an invalid filter for LOINC
8540 Primitive types have f:element/f:type/f:code which violates binding
- How interpret StructureDefinition differential?
- Request multi-level extension example
- Duplicate search parameter "familymemberhistory-daf-FamilyMemberHistory-condition"
- Complex extensions not showing proper icon
- Create and extension for O.refrange to allow for ...or equal to
- Remove Medication.name from Medication Resource
- Need enableWhen to work for non-answered questions too
- Clean up profile list
- Profile examples not published in IG section.
- Bad link generated in published pages to raw XML of IG-defined valuesets
- Need example valueset on ProcedureRequest.asNeeded[x] and indication elements
- Define MPI search for patient resource
- Erroneous warnings on path being generated by build
- Elements repeating in differential view
- QA: All properties are included in the Summary
- Questionnaire Summary items missing “name” of the Questionnaire
- ElementDefinition.type.code values not in data-type valueset
- Add two codes to provenance-participant-role for assembler and composer
- Profile element comments not displaying in element details
- Clarification for identifier system
- Typo for comparators in inclusive extension - fix = instead of <= and =>
- AllergyIntolerance.status value set
- Datatype Boolean - explanation required
- Don't require use of data elements for $populate w/ SDC
- Change EPUB link to readable version of FHIR Book
- Clarify description of slicing, not limited to element lists
- validation.zip's dataelements.xml contains duplicate fullUrl and canonical urls
- validation.zip conceptmap.xml contains incorrect canonical url
- Clarify that Subscription.criteria should not have a leading "/"
- Fix missing Provenance HL7 Extension
- Build not expanding Provenance valueset v3 Value Set ProvenanceEventCurrentState
- some slice members lack f:name
- The schema for Parameter resource is missing.
- Extensions missing in differential view
- Description of string search w/ :exact is slightly ambiguous
- Search Parameter Crossmap w/ Data Types Missing All Number Types
- Quantity Search Needs Clarification Regarding Quantities With Comparators
- Quantity Search Needs Clarification Regarding Value Semantics
